Ivan Burlakov

Senior Software Developer

Profile

I'm a responsible and purpose-driven Senior Software Engineer with a strong background in building applications across various domains and scales. My technical experience includes building applications using .NET, Java, and Node.js stacks.
I'm experienced in designing and delivering complex projects using Agile methodologies. I adapt quickly to new technologies and enjoy contributing to high-performing, collaborative teams focused on building impactful solutions.

Address

Frankfurt, Hessen
Germany

AWS

Languages

English
German
Russian

Hobbies

scale modelling, ski, sup, fpv (I have A1/A3 EU Certificate of Competence)

Employment History

Senior Software Developer at Billwerk+, Frankfurt am Main, Hesse, Germany

December 2022 — Present

Contributed to a subscription management platform, focusing on accounting and invoicing subsystems.

Skills: Angular · Amazon Web Services (AWS) · Java · ASP.NET Core · MySQL · Amazon Dynamodb · Amazon SQS

Software Developer at billwerk, Frankfurt am Main, Hesse, Germany

August 2022 — January 2023

Worked on developing a subscription management platform.
- Built and maintained the invoicing subsystem
- Implemented improvements in contract management
- Contributed to security enhancements

Skills: .NET Core · MongoDB · ASP.NET Core · AngularJS · ASP.NET MVC

Development Team Lead at FilmTrack, California, United States

January 2022 — June 2022

I led a small team focused on modernizing a crucial sub-system of the platform, utilizing a cloud native solutions from AWS.
- Led a small team of 5 developers
- Conducted load/stress testing to ensure scalability
- Managed the migrations of the system to the AWS infrustructure
- Maintained the legacy sub-system of instance management

Skills: .NET Core · ASP.NET Core · Amazon Web Services (AWS)

Software Developer at FilmTrack, California, United States

April 2020 — January 2022

I've been involved in multiple projects, focusing on enhancing system functionality and improving core components.
- Refactored the audit logging subsystem
- Implemented system-wide changes, starting database to UI
- Involved into cross-team collaborations

Skills: .NET Core · ASP.NET Core · Angular · Transact-SQL (T-SQL)

Senior Software Developer at Distillery, Los Angeles, California, United States

March 2011 — June 2022

Contributed to development teams for client projects, engaging in all stages of the software development lifecycle and leading several projects.

Skills: .NET Core · ASP.NET Core · C# · JavaScript · Node.js · TypeScript · Redis · Microsoft SQL Server · SQLite · Desktop Development · REST APIs

Software Developer at Distillery, Los Angeles, California, United States

June 2009 — March 2011

Contributed to the development of various applications and services for company clients.

Skills: C# · Transact-SQL (T-SQL) · Desktop Development · Performance Tuning · Web Development

Software Developer at Syncplicity, San Jose, California, United States

September 2010 — April 2020

Contributed to an enterprise-grade file sharing and collaboration service focused on enterprise clients. The project included development across web, API, and desktop platforms (Windows and macOS), with a strong emphasis on code quality and performance.
- Developed and maintained the website, API services, and desktop clients
- Performed bug fixes, performance optimizations, and ensured backward compatibility
- Integrated third-party low-level components and maintained legacy code
- Designed and developed a Slack integration plugin using a serverless architecture on AWS
- Actively participated in code review processes and maintained high unit test coverage

Skills: Microsoft SQL Server · ASP.NET · WPF Development · WinForms · NAnt · Thrift · Objective-C · Mono · Xamarin Products

Software Engineer at Check4 Ltd, London Area, United Kingdom

September 2009 — September 2010

Worked on a UK-based job search platform enabling users to search for job listings and CVs.
- Led the development of a mass CV ingestion tool
- Maintained and optimized the website, including SQL performance tuning
- Collaborated closely with the client's development team to ensure alignment and smooth delivery

Skills: Web Development · ASP.NET · WinForms · XML

.Net Developer at Oggetto

September 2008 — June 2009

Developed and maintained an e-commerce platform for selling vehicle spare parts, using .NET-based e-commerce engine.
- Led the project through design, development, and long-term maintenance
- Handled database queries performance optimization

Skills: ASP.NET · Microsoft SQL Server · E-Commerce · Amazon Web Services (AWS)

Software Developer at Deimand LLC

November 2005 — September 2008

I helped building mobile applications, video streaming system and other web and desktop apps.
- Led the small development team
- Focusing on gathering and analyzing product requirements
- Contributing to estimating and planning efforts

Skills: C# · ASP.NET · C (Programming Language) · Microsoft SQL Server · jQuery · WinForms · Team Management

Education

Southern Federal University (former Rostov State University)

Engineer's degree in Computer science, Information security
January 2001 — January 2006

Studied Computer Science with a focus on Information Security. Diploma work is "Correlation alerts analysis of intrusion detection system based on fuzzy logic". Awarded with honors.
